

Cleveland Clinic

Cancer Institute

Every year, thousands of patients travel to Cleveland Clinic Cancer Institute to receive the latest treatment advances in a compassionate environment. As a National Organization for Rare Disorders (NORD) Center of Excellence, and a hub for novel systemic, surgical, radiation and integrative therapies, Cleveland Clinic is at the forefront of cancer care and innovation. Our team of 800+ physicians, researchers and nurses are committed to helping improve outcomes and enhance patients' quality of life.

We specialize in multidisciplinary care and optimized time-to-treatment that is so crucial for many patients.

If you have a patient who has been diagnosed with a solid tumor or hematologic disease, they may benefit from treatment at our center, where we offer:

Access to **novel agents**, including cell and gene therapies and theranostics

Genetic testing and **targeted treatments**

Emerging radiation modalities that offer **maximum precision** and often **reduced treatment time**

Multi-disciplinary clinics across **Ohio** as well as **Florida**, **London** and **Abu Dhabi**

A world-class clinical research program, including our **Novel Therapeutics Clinic** for patients with specific genetic mutations or for those who are not responding to standard of care treatments

A renowned team of experts, including **specialists in rare cancers**, available through tumor boards, grand rounds and virtual meetings

A wide range of support for adverse effects from cancer treatment through our **CHIP clinic** and **pharmacovigilance clinic**

REFER A PATIENT To refer a patient to Cleveland Clinic Cancer Institute, please call the Cancer Answer Line at **866.223.8100** or complete our referral form at clevelandclinic.org/cancerreferrals. You will receive a confirmation code once the appointment is scheduled.

SUPPORTIVE CARE FOR PATIENTS AND THEIR FAMILIES

We believe that effective cancer treatment addresses not only clinical needs but the emotional toll that a cancer diagnosis has on patients and their loved ones. To that end, we deliver patient support services free of charge, made available thanks to philanthropic support.

When a patient joins our center, a nurse care coordinator and cancer program liaison work closely with them and their family to manage their individual medical treatment plan, ensure their treatment progresses in a timely manner and provide psychosocial support.

ADDITIONAL SERVICES INCLUDE:

- > Care delivered in the setting that **best meets a patient's needs**, including outpatient and virtual visits
- > **Palliative and supportive care** to offer an extra layer of support for patients struggling with pain, sleep issues or other symptoms
- > **Financial navigation** to make the most of insurance benefits and support patients facing hardship
- > **Drug repository program** to help patients who are facing financial challenges and are in need of orally-administered medications for cancer treatment and/or management of side effects
- > **Multidisciplinary integrative oncology** combining mind, body and lifestyle practices with conventional treatment to address cancer as well as the side effects of treatment
- > Dedicated **Cancer Answer Line** with trained specialists who assist with immediate access and provide ease to scheduling patient visits
- > An **Integrated Program for Young People with Cancer** that addresses the unique health needs of patients ages 15-49
- > A plethora of **support services** such as one-on-one mentoring through our 4th Angel program, a complimentary wig boutique, oncology massage, reiki and music and art therapy
